Dihydrolipoyllysine-Residue Succinyltransferase Component of 2-Oxoglutarate Dehydrogenase Complex, Mitochondrial

National Cancer Institute

Source

National Cancer Institute. *Dihydrolipoyllysine-Residue Succinyltransferase Component of 2-Oxoglutarate Dehydrogenase Complex, Mitochondrial*. NCI Thesaurus. Code C126542.

Dihydrolipoyllysine-residue succinyltransferase component of 2-oxoglutarate dehydrogenase complex, mitochondrial (453 aa, ~49 kDa) is encoded by the human DLST gene. This protein plays a role in both the Krebs cycle and lysine catabolism.
