Potential competing interests: No potential competing interests to declare.

Abstract

- The abstract provides an overview of the study but could benefit from a more structured summary format. Including explicit objectives, methodology, key findings, and implications would enhance clarity and alignment with academic standards.

Introduction

- The introduction effectively sets up the context by discussing the importance of agility in organizational resilience. However, it could be improved by clearly stating the research gap and the specific contributions of this study to existing literature.

Objectives

- The objectives are well defined, focusing on understanding how agility impacts financial resilience. However, they might be further refined to highlight any unique aspects or limitations in the approach compared to prior studies.

Theoretical Framework

- The theoretical framework is comprehensive and effectively references established theories of agility and resilience. Adding a concise summary of these theories could improve readability and provide a clearer foundation for the methodology.

Methodology

- Simplifying technical explanations or including visual aids would make it more accessible to a broader audience.

Results and Discussion

- The results are well-presented, with a focus on different companies' responses to crises. However, the discussion could further explore the practical implications of these results for managers and policy-makers.

Conclusion

- The conclusion summarized the findings but could benefit from a more direct statement on the study's contribution to theory and practice. Additionally, discussing limitations and suggesting specific areas for future research would strengthen this section.

References

- The references appear comprehensive and relevant.
