Dear Editor,

I hope you are doing well.

I have reviewed the article titled "Heat Transfer in Composite Materials: Mechanisms and Applications."

The review article discusses the different applications of heat transfer composite materials, including their mechanisms and methods.

I would suggest that the author incorporate more detailed insights about each material, including the percentage of heat transfer efficiency increase in sections 1, 2, 3, and 5 for particular materials. This more insightful addition would provide valuable direction for future research.

Thank you very much!
