

Review of: "Views and Attitudes of Pharmacy and Medical/Dental Students Towards Inter-Professional Education and Collaboration in the United Arab Emirates"

Sabita Yograj

Potential competing interests: No potential competing interests to declare.

First of all, I want to congratulate the authors for selecting the topic for study, as inter-professional collaboration is an important part of many competency-based curricula worldwide.

I agree with reviews posted by most of the reviewers, but I want to add a few comments to strengthen some of their posts:-

Title:

The title should be rewritten to make it short, crisp, and attractive.

Abstract:

- The mention of the pilot study is missing,
- The keywords need to be rewritten.

Main Article:

- Ethical approval from all the institutes is needed.
- The type of study needs to be updated.
- The table number 2 has confusion about the questions, as most of the questions appear to be targeted to MDs and not P students, please update it.
- Results need to be rewritten as too much content.
- Discussion can be shortened.
- Conclusion can be rewritten as it does not link with the study; write the conclusion with justification from the results of the study.
- Very old references are there.

All the best, lots of scope for future studies.
