# TRIP11/PDGFRB Fusion Gene

National Cancer Institute

## Source

National Cancer Institute. *TRIP11/PDGFRB Fusion Gene*. NCI Thesaurus. Code C99686.

A fusion gene that results from a chromosomal translocation t(5;14)(q33;q32) which fuses the 5' part of the TRIP11 gene with the 3' part of the PDGFRB gene. This gene fusion is associated with chronic myelomonocytic leukemia.
