Potential competing interests: No potential competing interests to declare.

I have read your manuscript, which is a very good article, and only publish some personal views for reference:

- 1) The summary part of the article lacks statements about research methods and innovation.
- 2) The references are too old and should be added for 2020-2023 years.
- 3) The logic of theoretical development needs further improvement.

Wish everything goes well with your work.
