Potential competing interests: No potential competing interests to declare.

The article is informative and useful, but it requires consideration of some important facts.

1. The number of citations in the paper is very few; please include more citations in all the different sections of the paper.
2. Is there any specific demand for cantaloupe? Please include that in the introduction.
3. The introduction needs more information, such as it has no mention of the types of cantaloupes, kinds of pests/diseases that are usually found in cantaloupes, and also more details on the process of aquaponics and greenhouse.
4. Cannot understand Figure 2 as it is not in English.
5. Please include statistical significance calculations in the results for Table 5.
6. Figure 7 is not very clear to understand.
7. The abstract mentions IoT technology usage, which is not very relevant.
