Potential competing interests: No potential competing interests to declare.

The paper title is good. It represents what has been discussed in the content.

In general, the papers are good and have contributions to the subject matter.

I think there are some typos on page 5, paragraph 2, sentence number 3. "He will perceive..." Is the word 'he' correct?

General comments:

In the whole manuscript, the author used normal font to represent mathematical symbols, which is different from the one present inside the equations.

Suggestion: The author may synchronize the symbols used in the sentences and in the equations.

This paper will be accepted for publication.
