Potential competing interests: No potential competing interests to declare.

The author has performed studies on a topic that can be considered a novelty in this work. It is a fact that this study has aspects that can be developed in the future. However, the article needs to be enriched from the Abstract section to the Reference section thoroughly. Especially, the Introduction, Literature Review, and Materials and Methods sections should be reviewed again. The purpose of the study, the methods used, and the evaluation of the results should be explained in detail. Research should be conducted on similar studies related to the topic of Nested Neural Networks in the literature. Thus, the properties of this study should be handled in terms of advantages and disadvantages. In its present form, this study does not seem to be acceptable for publication. It requires quite comprehensive additions and adjustments.

Best regards and yours sincerely,
