Potential competing interests: No potential competing interests to declare.

Introduction should provide more reasons to study the aim's paper.

Specific approval of an ethics committee must be obtained.

More data regarding patient data should be described (n=103,955).

The diagnosis of periodontitis should follow the 2018 classification.

How was the normal distribution of the variables checked?

In Table 1 how were all the variables of comorbidities percentages variables diagnosed?

How was moderate and severe periodontitis?

Supplementary tables should be included as important tables. They describe the aim of the paper
