

# Review of: "Hybrid Approach - A 21st Century Skill in Science Education"

Miftahus Surur

Potential competing interests: No potential competing interests to declare.

## Abstract

The abstract should be organised systematically, starting with the presentation of the research objectives, methods, results, and findings and conclusions.

## Introduction

1. The background to the problems revealed has not been supported by quantitative and qualitative data from observations
2. The problems revealed are too simple so that the urgency of research becomes less relevant
3. The purpose and novelty of the study have not been disclosed

## Method

We recommend that the method section is explained in full regarding:

place, subject, number of subjects, data analysis techniques, data collection techniques, instrument preparation techniques, instrument validation techniques, data analysis techniques and research steps clearly

## Discussion

The discussion section should be presented separately from the research results

the discussion is less supported by relevant theories and previous research results

## Conclusion

Relevant suggestions that can be used as a foothold for the next researcher have not been conveyed.

In addition to the results, research findings should be conveyed which is the impact produced by the research.
