Potential competing interests: No potential competing interests to declare.

This is an interesting study, bringing together important information regarding the use of Solanum nigrum in traditional medicine, but the authors have presented the information from this study in a form that does not attract the reader's curiosity.

This work is important; to publish it, the authors are obliged to make minor corrections and modifications to improve it.

- Homogenize and reduce the dimensions of the figures

For point 3, Potentiels pharmacologiques et thérapeutiques détaillés

- Preferably give the results of this research (followed by the references), without detailing the techniques or methods of the work because it is a synthesis. We construct consistent paragraphs for each use or activity.

- Poorly written references, e.g., (~~A. Zaidi et al. (2014)~~) (Zaidi et al. (2014))

- Standardize bibliographic references and follow instructions for authors

- Point 7, Results and discussions, is a conclusion to be reviewed
