Bifidobacterium pseudocatenulatum

National Cancer Institute

Source

National Cancer Institute. *Bifidobacterium pseudocatenulatum*. NCI Thesaurus. Code C122249.

A bacterial species in the family Bifidobacteriaceae. *B. pseudocatenulatum* hydrolyzes phytate and ferments amylopectin and amylose and does not ferment D-galactosamine, D-glucuronate, arabinogalactan, pectin, or gums. This bacteria is a normal part of the gut flora and is frequently used as a probiotic.
