Potential competing interests: No potential competing interests to declare.

The author tried to put a holistic view. However the work is not very promising.

1. The abstract should include purpose of the study, methodology used, findings, and its implications.
2. The analysis techniques are weak.
3. The literature review has to be very strong with strong theoretical foundation.
4. The research future implication should be robust.
5. I believe that research lacks innovativeness.
