Heat Shock 70 kDa Protein 1A/1B

National Cancer Institute

Source

National Cancer Institute. *Heat Shock 70 kDa Protein 1A/1B*. NCI Thesaurus. Code C104001.

Heat shock 70 kDa protein 1A/1B (641 aa, ~70 kDa) is encoded by the human HSPA1A and HSPA1B genes. This protein is involved in the mediation of protein folding.
