After carefully reviewing the manuscript "Misdiagnosis of Dengue Fever as Malaria and Typhoid Fever and Their Co-infection in Rural Areas of Southwest Nigeria", it is recommended to send it for minor revision. Some concerns include:

1. **Grammatical and punctuation-related issues:** Please refer to the attached PDF 'grammar_punctuation_report' (there are 259 issues)
2. **Plagiarism-related issues:** Please refer to the attached PDF, 'plagiarism-report-Abstract and introduction part-1', 'plagiarism-report-introduction part-2', 'plagiarism-report-Study design', 'plagiarism-report-Demographic distribution and discussion part-1', and 'plagiarism-report Discussion-part-2'.
3. **Insufficient background and current information regarding dengue statistics (national and international status).**
4. **Statistical analysis and interpretation-related issues:** In the study design, a proper explanation of sample size was not provided. In the co-infection part, the p-value is missing.
5. **Future aspects:** The references are old and insufficient. It lacks recent references from 2020-2024.
