Voltage Criteria Suggesting Left Ventricular Hypertrophy, Without Secondary ECG Findings

National Cancer Institute

Source

National Cancer Institute. *Voltage Criteria Suggesting Left Ventricular Hypertrophy, Without Secondary ECG Findings*. NCI Thesaurus. Code C130067.

An electrocardiographic finding of large QRS amplitudes that may indicate left ventricular hypertrophy, but is without any of the secondary findings that are typically seen with this diagnosis: left atrial enlargement, left axis deviation, or typical pattern of ST depression and T wave inversion.
