To the Chief Editor,

We appreciate your inviting us to evaluate the original research published in the Journal of Qeios, "The Growth Performance of Nile Tilapia (Oreochromis Niloticus) Fed Low-Cost Fish Feeds Formulated From Fish By-Products, Fishery By-Catch, and Pig Blood-Meal."

Authors

1. Verify the paper's writing in terms of language.
2. Provide a thorough explanation of the procedures to facilitate a repeatable version.
3. Give a true, original explanation of the ingredients and the process for producing blood meal, fishery bycatch, and by-products from fishing.
4. At the conclusion of the conversation, I advise creating a conclusion partition.

Making a figure that summarizes your study and conclusions is more appropriate, in my opinion.

Decision: Accepted after making or responding to the questions and suggestions.
