

Review of: "Students' perceptions of e-participation in social media, citizen mobilisation and engagement: Evidence from Papua New Guinea, India, and Zimbabwe"

Dr Letjedi Thabang Mabinane, PhD

Potential competing interests: No potential competing interests to declare.

- Insert punctuation marks where necessary.
- **Social media perspective:** would suggest structuring this section on three levels; Global, regional, and country.
- Number heading levels accordingly to improve reading and flow.
- Since this study is about social media, I would suggest you provide a brief overview of the ICT/Telecoms infrastructure, including ICT Policies, the number of mobile networks/service providers, internet and social media penetration, cost of data, and other key indicators per country of study. You can get these from the likes of We are Social, Internet Live Stats, ITU, Cable.co.uk etc.
- How universities were picked, which sampling technique did you follow?
- Need to choose whether your primary units of analysis were university students or their leaders. Choose one and be consistent in your reporting.
- How your data was analysed, Excel, SPSS etc.?
- 3rd objective is not clearly articulated, as opposed to objectives 1 and 2
- In the form of a diagram/figure, show the theoretical framework that you talked about. This could boost the weight of your research.
- This could make a good publish, provided the author addresses my comments.
