Potential competing interests: No potential competing interests to declare.

Refined Focus: The paper could benefit from a more focused approach. Instead of providing a broad overview of various IT trends, consider narrowing down the scope to a few specific trends or areas within tertiary education where IT trends have had the most significant impact. This will allow for a deeper dive into those areas, providing more insightful and comprehensive analyses.

Detailed Case Studies or Examples: Including case studies or specific examples of how these IT trends have been implemented in tertiary education would enhance the paper's credibility and applicability. Real-world examples would illustrate the practical implications and successes/challenges faced in integrating these technologies.

In-depth Analysis: While the paper touches on multiple IT trends, there's a need for more in-depth analysis within each trend's application in tertiary education. Expanding on the specific implications, challenges, and opportunities each trend presents would provide richer insights.

Clearer Structure and Organization: The paper could benefit from a clearer structure. Organizing the content into sections based on individual IT trends or their specific applications in tertiary education would improve readability and comprehension.

Empirical Evidence and Data: To strengthen the claims and findings, consider incorporating empirical evidence or statistical data where available. Including quantitative data or results from studies conducted in tertiary institutions would add credibility and depth to the discussion.

Discussion of Challenges and Limitations: While the paper briefly mentions difficulties in cloud-based solutions, a more comprehensive discussion on the challenges and limitations of implementing these IT trends in tertiary education would provide a balanced view. Addressing potential obstacles and how institutions are navigating them would offer valuable insights.
