

Review of: "The Choice of Breeding Objectives and Selection Criteria Decided by Breeders of Various Goat Breeds and Factors Influencing Them"

Giovani Luis Feltes

Potential competing interests: No potential competing interests to declare.

The manuscript is interesting and well-written. My suggestions are:

Add the quiz questions as supplementary material.

Add more details about the statistical analysis used, such as the model, degrees of freedom, etc.

Break down figure 1 into five figures to make it easier for the reader to see.

For Tables 3 and 4, the table title is on a different page from the rest of the table; place it on the same page.

Table 6 appears in the text after completion; this needs to be changed.

These are my contributions to the manuscript.
