Potential competing interests: No potential competing interests to declare.

I would like to address several significant concerns regarding the manuscript:

1. The author's exposition of the problem and the research gap lacks clarity and coherence.
2. The methodology section requires enhancement, particularly in terms of the sampling method and data collection techniques.
3. Both the contribution and conclusion sections would benefit from improvement.
4. The overall quality of the article could be enhanced through the engagement of a proofreading service.

While I acknowledge that the paper may be considered for publication, it is my sincere belief that the author should strive to enhance the manuscript by incorporating the feedback provided, as well as considering input from other reviewers
