## Review

Thanks for the opportunity to review this interesting research.

- **The objective of the research is well justified**

- The abstract should be brief, concise, objective and balanced
- Methodology is very brief
- All the 82 deaf people and the families were interviewed? not clear
- The writing style- Therefore, it is necessary to provide ISL training to the deaf people of Dhadkai to improve their accessibility. Training in Indian Sign Language (ISL)
- Using local terms need to be corrected (such as The Sarpanch asked for some residential solutions for the deaf children.....)
- Discussion part?
- Village residents opinion can be included in the paper.
- *Generally, it is advised not to make references in the Conclusions section*
