

# Review of: "Harmful “Herbalism” maliciously spreading from Mexico determines cases of iatrogenic Cushing's syndrome"

Gerardo Santos-López

Potential competing interests: No potential competing interests to declare.

Dr. Carpio-Orantes writes a summary of great interest to the general public. It is necessary to call attention to the danger represented by the consumption of this type of products that do not have adequate information, neither quality control nor registration with the appropriate health agencies. Fortunately, regulatory agencies have acted on the matter, however, it is necessary to be alert because these products are constantly emerging.

I only want to recommend that the source of information in table 1 be added.
