Lattice corneal dystrophy type I

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. [Lattice corneal dystrophy type I](#). ORPHA:98964

Type I lattice corneal dystrophy (LCDI) is a frequent form of stromal corneal dystrophy (see this term) characterized by a network of delicate interdigitating branching filamentous opacities within the cornea with progressive visual impairment and no systemic manifestations.
