Potential competing interests: No potential competing interests to declare.

The arguments put forward by the author would sound more convincing if supported by adequate literature review of past studies relevant to the focus of this study. Knowing what have and have not been studied allow for better understanding of research gaps that would add more value to in the contribution of the subject.

The methodology did not clearly describe the process used in identifying respondents, sampling technique, data gathering, analyzing and developing themes that would help readers to understand the regiment and discipline employed for this research study.
