In the abstract, please include the methodology used for the research. Too many reports on results in the abstract. The author can arrange to write only a summary or conclusion of the results in the abstract.

No literature review is written in the manuscript. In materials and methods, the author can include the sampling techniques used for the study. How did the author decide on 140 respondents? In the questionnaire, provide justification for how the author organized the questions (adopted or adapted from which source)? Please include the time frame of the study.

In the conclusion, please elaborate more on the implications, limitations, and future recommendations of the study.

Make sure the author refers to journal articles from the last 5 years for references to keep the sources updated.
