# Protein-Serine O-Palmitoleoyltransferase Porcupine

National Cancer Institute

## Source

National Cancer Institute. *Protein-Serine O-Palmitoleoyltransferase Porcupine*. NCI Thesaurus. Code C132191.

Protein-serine O-palmitoleoyltransferase porcupine (461 aa, ~52 kDa) is encoded by the human PORCN gene. This protein is involved in serine palmitoylation of Wnt family proteins.
