Potential competing interests: No potential competing interests to declare.

Authors discuss the role of universities for achieving sustainable Smart Cities in India. The second section of the paper discusses the status of the Smart City of India.

However, motivations based on applications and research gap are missing

the related work is missing many advanced technologies used to mitigate the impact of COVID-19 and applications include Blockchain for decentralized multi-drone to combat COVID-19 and future pandemics: Framework and proposed solutions,

Blockchain-Empowered Multi-Robot Collaboration to Fight COVID-19 and Future Pandemics.

,Blockchain-based digital twins collaboration for smart pandemic alerting: decentralized COVID-19 pandemic alerting use case

Conceptual Framework of Contact-Less Consumer Products Industry During and Post-pandemic Era

objectives need more explanation

does there any city in India that have all of facilities to be smart city
