This is a very interesting paper. I would include a brief discussion about the antagonistic role of cytotoxic CD4 T cells and follicular T cells (DOI: [10.1016/j.celrep.2016.10.013](https://doi.org/10.1016/j.celrep.2016.10.013)), as this might be particularly interesting to discuss the development of memory B cells (influenced by follicular T cells), and seems to be modulated by the type of virus.
