The MS "Natural Polyphenols of Pomegranate and Black Tea Juices can Combat COVID-19 through their SARS-CoV-2 3C-like Protease-inhibitory Activity" is a short review paper. It can be published after some revision.

Please, see some comment bellow

Introduction part it is important to admit about possible role of plant-derived natural antiviral compounds for the development of plant-based drugs against coronavirus and review with analysis effects of different plant extracts during period of pandemic period. Please, see ref bellow

Second point it would be good to add more information about detailed biochemical composition of pomegranate and black tea extracts based on the literature search in the scientific databases.
