# Carmegliptin Dihydrochloride

National Cancer Institute

## Source

National Cancer Institute. *Carmegliptin Dihydrochloride*. NCI Thesaurus. Code C81701.

The dihydrochloride salt form of carmegliptin, a potent, long-acting, selective, orally bioavailable, pyrrolidinone-based inhibitor of dipeptidyl peptidase 4 (DPP-4), with hypoglycemic activity. Carmegliptin shows extensive tissue distribution and is excreted unchanged in the urine and bile.
