

Review of: "Stakeholders' Perception of Socioecological Factors Influencing Forest Elephant Crop Depredation in Gabon, Central Africa"

Phub Dorji

Potential competing interests: No potential competing interests to declare.

Overall: The information is insightful, but the length of the manuscript is a little long.

Abstract: It needs to be shorter and more concise.

Materials and methods: Need to indicate forest types and their coverage in proportion to human settlement area in the study area. Mention types of crop CDI in the study area. Methods for selection of villagers need more clarification. Data collection methods should be clearer and more systematic.

Results and Discussion:

Conclusion: What are the policy recommendations from this paper? Make a clear statement.
