Gentlemen,

The paper needs complete revision with significantly more supporting analysis. For example:

1. A before and after comparison
2. Analysis by age and gender
3. Analysis by condition
4. Analysis by day of admission (as in day of week)
5. Any mortality rate data
6. A description of how the unit links to other wards in the hospital, etc

Apart from the supporting analysis and wider literature review the paper is of limited scientific value.
