Review of: "Treatment of Facial Ageing with Ozone Therapy: Clinical Case Report"

Laura Piejko¹

1. Physical Education Academy in Katowice, Poland

Congratulations to the authors for submitting a very interesting case report. There still remains a lack of studies that thoroughly explore this form of therapy.

I have only a few comments:

- Please provide a detailed description of how exactly and by whom the facial areas showing the most signs of aging were mapped.
- Please describe the Figure (photo) and please link the photo to the discussion text.
- Please describe who performed the treatments and who obtained the results (nurse, esthetician, physician?)

Best regards to the authors.
