Sargramostim Plasmid DNA Hepatocellular Carcinoma Vaccine Adjuvant

National Cancer Institute

Source

National Cancer Institute. *Sargramostim Plasmid DNA Hepatocellular Carcinoma Vaccine Adjuvant*. NCI Thesaurus. Code C48420.

A vaccine adjuvant consisting of a plasmid DNA encoding sargramostim (granulocyte-macrophage colony-stimulating factor). Upon administration, expressed sargramostim may stimulate a cytotoxic T cell response enhancing the host immune response to a concomitantly administered hepatocellular carcinoma vaccine. (NCI05)
