Very good efforts made by the authors. However, I want to give some suggestions which may be beneficial for the improvement of this work.

1. The authors needs to state few clear reasons for why they pick this research .
2. The authors did not clearly state the key objectives of this research.
3. Can you please explain why Def.2.8 is relevant in your work?
4. Figure-7 needs to explain in details.
5. In the related works part, the authors also can check the works such as 2 Satisfiability (2SAT) and 3 Satisfiability(3SAT) works done by the several researchers.
