Potential competing interests: No potential competing interests to declare.

1. The theme of the manuscript is interesting and tries to address few of the current needs/demands of industry 5.0.
2. The title of the manuscript does not reflect the variables of the study.
3. Introduction is shorter than required. It can be increased by underscoring the significance of the outcome variable of your study. It can be increased by highlighting the problem and gaps in the literature and how your study contributes in filling out the gaps.
4. Conclusion is excessively lengthy. The information can be placed in discussion segment.
5. More citations should be used to support your study.
