Potential competing interests: No potential competing interests to declare.

The author has written about multiple reason for COVID-19 vaccination and possible solutions. However, no data or reference is given how hesitancy against COVID-19 vaccination is resulting in hesitancy towards well established vaccine. If there are such example and data available for established vaccine author should share. Its talking more about current problems of why COVID-19 vaccine hesitancy is there, lacunae and how it can be decreased but how this reflects hesitancy towards well established vaccine is not been adressed. Author should try to give relevant information to reflect title.
