

Review of: "Glycemic Control Is Associated With Lipid Profile and Atherogenic Index of Plasma in Type 2 Diabetes Mellitus"

Jean Pierre Fina Lubaki

Potential competing interests: No potential competing interests to declare.

Dear Editor,

Dear authors,

It was a pleasure to share this paper for review.

The paper is well written. A number of points need attention.

Minor concerns:

Be sure to spell out all the abbreviations at the time of first appearance.

Results: The fourth sentence begins with a number; could you put it in words?

Major concerns:

The objective is not clearly set out in the last sentence of the introduction; could the authors clarify the motivation of the study?

Not mandatory:

- The list of socio-demographic and clinical characteristics described in the study is very short. This possibly limited the exploration.
- One may discuss categorizing glycaemic control in two categories and using a logistic regression.

Recommendations:

Accept with minor corrections.

Thank you,

The Reviewer
