Dear Editor

Thank you very much for giving me the opportunity to evaluate this manuscript. The topic of the paper is important, but the manuscript needs further improvement, development, and analysis. I point out the following:

- The title was general.
- I suggest reviewing more previous studies related to the topic.
- Follow a clear methodology.
- In the results and discussion, the author mentions several sources, but it should include the researcher's analysis and the results, and he can mention the sources in the introduction or in the literature review.

The manuscript could have been more in-depth, as it needs more work.
