Aeromonas sobria

National Cancer Institute

Source

National Cancer Institute. *Aeromonas sobria*. NCI Thesaurus. Code C86130.

A species of facultatively anaerobic, Gram negative, rod shaped bacteria assigned to the phylum Proteobacteria. This bacteria is motile by polar flagella, oxidase positive and hemolytic. *A. sobria* is found in soil and water and is pathogenic, causing gastroenteritis, bacteremia, and soft tissue infections, especially of the eye.
