

# Review of: "Metadichol Induces CD14 Glycoprotein Expression in Human Embryonic Stem Cells and Fibroblasts"

Taty Anna Kamarudin<sup>1</sup>

<sup>1</sup> Universiti Kebangsaan Malaysia, Malaysia

Potential competing interests: No potential competing interests to declare.

This is an interesting report. However, it still lacks some important scientific merits.

The author did not explain what metadichol is, even in the abstract and introduction sections.

The origin of the cell lines used in the study was not given, and the ethical aspect was not declared.

There was no mention of any statistical analysis done.

This report needs to be revised, and necessary information or data need to be included, without which it does not qualify for publication.
