

# Review of: "The Nexus between corporate social responsibility and corporate social performance in the Service-Based Enterprises Sector: Insights from Zimbabwe"

Labrini Sideri<sup>1</sup>

<sup>1</sup> National and Kapodistrian University of Athens

Potential competing interests: No potential competing interests to declare.

This is a great effort.

I would only add some comments to be better.

1. You need to have more clarified definitions, as there are slight difference between some concepts (e.g. CSR - ESG).
2. CSP is not a dimension..
3. p.4 "The case for corporate...Le, 2022)." needs to be rephrased to make sense.
4. p.5 "Corporate social performance...society". Poor definition. Needs to be more comprehensive.
5. p.5 "Thus...practice." This period has expressive and syntactical errors. Rephrase.
6. p.5 encampuses → encompasses maybe?
7. CSP has been widely used interchangeably with other similar (?) terms (Sustainable competitiveness, business performance, sustainability performance, orgaizational performance). It seems sustainability performance to fit better.
8. p. 6 & 7 "components/types of CSR"? You mean dimension maybe..
9. p.9 "Based...charitable" unclear.
10. So many abbreviations used. CR, CS, CT should be written in full in some cases like p.10 above the Figure 1.
11. Descriptive demographic information: smaller section, less tables (all-in-one table).
12. Data purification: smaller section, less tables
13. p. 25-26 You need to refer to the Hypotheses written in full not only H1, H2 etc.
14. Discussion and conclusions: restructure the whole paragraph. Maybe last sentence needs to be first.
15. ECR, ENR, and ETR direct relationship with PHR results: The intererpretation ofthe results does n ot make sense. It needs to be more comprehensive. Numbers are not enough to understand...
16. Conclusion: Very brief conclusion. At least two more paragraphs should be added (one in the beginning and another one in the end). Last paragraph is quite puzzling, needs to be rephrased.
17. You ought to make an appendix. One for the tables/figures and one for the appreviations.
