# Adrenal Cortex Adenoma

National Cancer Institute

## Source

National Cancer Institute. *Adrenal Cortex Adenoma*. NCI Thesaurus. Code C9003.

A benign neoplasm that can arise from any of the adrenal cortical layers. It can be associated with the overproduction of glucocorticoids (Cushing's syndrome), androgenic or estrogenic steroids (adrenogenital syndrome), or mineralocorticoids (Conn's syndrome). (Sternberg Diagnostic Surgical Pathology, 3rd ed.)
