Potential competing interests: No potential competing interests to declare.

All researches in the field of spatial education are rare and precious, we have found in this study a concept of remediation, art, life skills and learning; which is required in young children's age but in ASD children's life for long time; given their decalage of mental age comparing to typical ones, and also their spatial cognitive style

I put in my review the expressions and phrases to regulate, in addition to the suggestions that much more the context the methods and the techniques were good
