Potential competing interests: No potential competing interests to declare.

1. In the abstract it is necessary to add the contribution of research to the development of science.
2. In the research methodology, the Linear Regression model equation with the STIRPAT model is added, as well as the stages of using this model.
3. In the Significance of the study, it is best to display the Regression Results with the STIRPAT model along with the model feasibility test, so that readers can cross check the analysis results.
4. In the conclusion it is necessary to add research limitations and recommendations for research results for the Indian government.
5. Please use the literature in the reference list from the last 10 years to the current year.
