Potential competing interests: No potential competing interests to declare.

The authors are trying to connect three vital aspects, i.e., Gut microbiome, Bone health, and Air pressure. Please find the following comments

1. The connection between the Gut microbiome and Bone health has been extensively researched. Even the connection between the microbiome, bone health, and menopause has been reported. The same should be included from the context of the sex of the individuals.
2. The direct connection between the gut microbiome and air pressure is missing. That needs to be included.
3. The connection between air pressure and bone health is also missing.
4. For the triad to be discussed, these connections would be an important addition and would further strengthen the manuscript.
