Potential competing interests: No potential competing interests to declare.

This review paper is well-written, but needs major changes:

- * As a review paper, references are not enough. Please discuss each part in more detail. The manuscript is easy to follow, but its quality is very low.
- * Please mention the references to theories in table 3.
- * The caption of Figure 3 needs more description.
- * Figure 1 is not applicable, and it seems that the figures were downloaded from Google.
