Potential competing interests: No potential competing interests to declare.

This paper is well written with clear issues of the site. However need to write in detail the method section particularly the three-staged research: (i) the collection of data from the field through primary survey. (ii) content analysis of the qualitative research data through data from local bodies of government and (iii) land use, ground-figure analysis drawings by research authors....These stages need to be explained in detail.

In terms of conclusion, say something from the future planning perspective of the city.
